Brookline PAX

is a 55-year-old grassroots advocacy organization that campaigns for liberal causes and works to achieve increasingly progressive government in Brookline. We actively support:

Outstanding Public Education — PAX is committed to the public schools. The organization and the political candidates it supports have a proven record in support of public education, from early childhood through graduate school.

Excellent Public Services — PAX supports sustained state and local investment in quality municipal services such as police and fire protection, public health, libraries, schools, parks, recreation, and public works, as well as state services such as social programs, transportation and environmental protection. PAX and its endorsed candidates pursue policies of support for basic human needs, including healthcare for all, affordable housing, and services for both children and senior citizens.

Respect for Public Employees and Organized Labor — PAX stands up for fair labor practices and for policies that show respect for the dedicated people whose competence and commitment make Brookline and this Commonwealth work.

Respect for the Environment — PAX is committed to keeping Brookline and this Commonwealth livable and environmentally responsible by supporting recycling; energy conservation; the maintenance and enhancement of parks, play-grounds, and green space; and sound environmental regulation.

Diversity, Social Justice, and Peace — PAX works to preserve and increase ethnic and economic diversity and social and economic justice for all, through affordable housing, universal health care, and fundamental civil rights and liberties. We respect the human rights of all people, regardless of ethnicity, nationality, or location; and we support multilateral solutions to international affairs. We oppose the unilateral use of military force except when applied defensively under international law and clear and convincing evidence exists of a serious and imminent threat of aggression, and then only force no more than commensurate with the magnitude of the threat.
